ASSET AND PROJECT MANAGEMENT CONFERENCE APMC 2025

About APMC2025

APMC2025 (The 3rd Asset and Project Management Conference) is a conference on Project Management and Asset Management which is co-organised by the Malaysian Asset and Project Management Association (MAPMA) and Public Works Department of Malaysia (JKR Malaysia).

For your information MAPMA was established in 2008, under the auspices of JKR Malaysia, with the objective of being the principal driving force in the Malaysian Government's push to achieve excellence, not only in the Project Management of our nation's construction projects and installations but in Asset Management of those projects and installations after completion. It is with this aim in mind that these APMC's were organised, in tandem with

the National Asset and Facilities Management Convention of Malaysia (NAFAM), which is on a subsequently larger scale.

APMC2025 is the 3rd edition of the conference after the first and second edition was held in 2019 and 2023 subsequently. With the theme "Sustainable Asset Management: Environmental Social, and Governance (ESG) in Highways, Buildings Water, and Energy Industries", APMC2025 will gather Project Management and Asset Management experts from Malaysia and around the world and will be a place for exchange of ideas, networking and engaging in lively discussions on emerging topics of interest in the areas of Project Management and Asset Management.

Who should attend?

- Contractors
- Consultants
- Government and private sector personnel involved in the management of construction projects and installations
- Government and private sector personnel involved in the asset management of projects and installations after completion
- Asset owners
- Asset operators
